CONTENTS

1. Structure and chemical bonding in Zintl-phases containing lithium 1
   R. NESPER

2. Multiphase diffusion in binary and ternary solid-state systems 47
   F. J. J. VAN LOO

3. High-resolution electron microscopy in solid state chemistry 101
   L. KIHLBORG

4. Fractal structures 135
   P. MEAKIN

5. Scanning tunneling microscopy and the atomic structure of solid surfaces 235
   F. OGLETREE and M. SALMERON
